Hypnosis has a first class record of success in pain relief, recognised by the British Medical Council. Hypnotic pain relief is rated stronger than morphine in its ability to relieve pain.

Quantum Pain Therapy is a hypnotic technique that uses a unique method of pain relief known as Quantum Mind Code technology. This new technology has the ability to terminate pain in a matter of seconds and go on to give relief from pain for years. It produces natural anaesthetic which will allow patients to undergo major, complex and painful surgery which would normally require high levels of anaesthetic.

3. The Hypnosis Gastric Band – Diploma Training Course

Powerful Hypnosis Weight Loss

As a Hypnotherapist it is essential for you to succeed in the weight loss arena, as today it is the bread and butter of the Hypnotherapy business. Here at the British Academy of Hypnosis we have created an incredible support program to successfully help people lose weight and increase health.

Real gastric band surgery can be very expensive and certainly not without its dangers. Unfortunately for those who decide to undergo this intrusive weight loss surgery success is not always guaranteed as it doesn't fix the mind set.

Once your mind is in the right place you can achieve anything. The Gastric Mind Band Program consists of a 6 session weight loss program with extensive support and body monitoring.

Once you have fitted the Gastric Mind Band it is essential to offer nutritional support and guidance to your subjects. The course has it all mapped out for you.

Not just fast and easy weight loss but a complete weight loss system where you will monitor your subjects success through the weight loss program. Ensuring they lose weight, body fat and visceral fat, whilst maintaining bone mass, muscle mass and hydration.
